

Form Inliners for Drums & Pails

Making steel and plastic drums easy to reuse, recycle and recondition.

Thermoformed, seamless Form Inliners fit each outer container like a second skin without any folds or pockets which makes them ideal for mixing, pumping, agitators and follower plates. Form Inliners have a contoured lip that fits over the chime of the drum preventing leakage between the liner and the container wall and are particularly suitable for adhesives, colours, lacquers, pigments, silicone and food products etc.

Benefits:

- Allows maximum product recovery
- Simple to fit to maintain productivity levels
- Protects valuable product from contamination
- Can be used in new, standard, reconditioned and ISO drums
- Makes single trip drums genuinely multi trip
- UN approved and EU & USA food approved

Materials:

- LDPE: For general use, good chemical resistance, robust yet flexible
- Anti Static: LDPE with a static resistance between $10^8\Omega$ and $10^{11}\Omega$, this reduces the build up of static, improving safety
- Polypropylene:
For hot fill and solvent based products
