

# Round Bottom Liner

NITTEL Round Bottom Liners are the ideal solution for lining your drum or pail. Our liners are available in a range of materials.

NITTEL Round Bottom Liners are manufactured by welding a circular disc to one end of an open ended tube of material. The weld then forms a liquid tight seal. This technology provides a high level of tear resistance. The accurate fit of the liner reduces the formation of creases and air pockets, which is often a problem with ordinary flat bags.

#### Use:

Pails: 5 to 40 litres

Plastic drums: From 30 to 225 litres

Steel drums: From 60 to 225 litres

#### Versions:

Open at the top

Top Closed

#### Material:

Monofilms made of LDPE (antistatic and conductive), HDPE (antistatic) and Polyamide

Coextrusion films (antistatic and conductive)

Aluminium foils

#### Application Examples:

LDPE - Ideal for liquid, powder and granulates

Polyamide - Ideal for hot filling up to 180°C and for products with a high solvent content

Co-extrusion - Ideal for hot fillings of up to 120°C and for products with solvent content

Aluminium foil - Ideal for [reactive] hot-melt adhesives

- Can be used in all types of containers
- different heights and diameters available
- Protects valuable product from contamination
- Can be used in new, standard, and reconditioned containers
- Makes single trip containers genuinely multi trip
- EU & FDA food approved materials available
