

Freight Container Liners

Freight Container Liners are either filled through the door using a nozzle or, in the case of top-loaders, through a hatch.

NITTEL Freight Container Liners are either filled through the door using a nozzle or, in the case of top-loaders, through a hatch. They are equipped with guide ropes, a strong corrugated cardboard door guard, metal retention bars and lateral corrugated cardboard aids for the discharging of residual product. NITTEL Freight Container Liners are suitable for all types of granulates, e.g. PE, PVC.

Use:

20' - 40' ISO freight containers

Versions:

With filling nozzle in the top plate for top-loaders

With up to 4 filling and discharging nozzles for loading and unloading through the rear door

Material:

LDPE

Co-extrusion films

Aluminium foils

Application Examples:

NITTEL aluminium foil freight container liners: Ideal for transportation of plastic granulate in intercontinental shipping, e.g. for transportation of polyamide granulate from Europe to Asia.

- Allows maximum product recovery.
- Simple to fit to maintain productivity levels.
- Protects valuable product from contamination.
- Can be used in all 20' and 40' containers..
- EU & FDA Food Approved materials available.
